EXPERIENCE

Senior Software Developer2015 - Present

Enterprise Solutions

Leading development of enterprise-grade .NET applications, designing scalable architectures, and mentoring junior developers. Built mission-critical business systems serving hundreds of concurrent users.

Full-Stack .NET Developer2010 - 2015

Software Development Firm

Developed and maintained complex business applications using ASP.NET MVC, SQL Server, and Crystal Reports. Implemented RESTful APIs and optimized database performance.

Junior Developer2008 - 2010

Tech Startup

Started career building web applications with C# and ASP.NET. Gained deep expertise in SQL Server database design and T-SQL stored procedures.

SELECTED PROJECTS

Enterprise Data Management System

Business management software supporting booking, production, delivery, invoicing, receivables, and operational workflows. Built with C#, ASP.NET, SQL Server, Crystal Reports.

AI Data Assistant

AI-powered data assistant converting natural-language questions into validated SQL queries. Built with Python, Flask, React, SQL Server, LLM, RAG.

Executive Dashboard

Business intelligence dashboard providing executives with real-time insights into sales, realization, and financial performance. Built with ASP.NET Core, SQL Server, Chart.js.
